Revolutionizing India's Security Infrastructure

Who We Are

Capture World is a professional organization specializing in the design, supply, installation, and maintenance of comprehensive security and infrastructure systems. We serve as a single-point partner for organizations seeking fully integrated, turnkey security solutions

Our Mission

To empower organizations with world class, integrated security infrastructure that is intelligent, reliable, and future-ready.

Our Commitment

End-to-end turnkey solutions—from consultation and system design to supply, installation, testing, commissioning, and comprehensive Annual Maintenance Contract (AMC) support

Our Promise

Uncompromising quality, transparent pricing, and dedicated support that keeps your infrastructure protected around the clock

Capture World
SECURE • CONNECT • PROTECT

SOLUTIONS WE OFFER

CCTV SURVEILLANCE SYSTEMS

FIRE ALARM SYSTEMS

PUBLIC ADDRESS SYSTEMS

ACCESS CONTROL SYSTEMS

TRIPOD / BOOM BARRIER SYSTEM

FULL HEIGHT TURNSTILE

ASPIRATION SYSTEM (VESDA)

INTRUSION ALARM SYSTEM

BUILDING MANAGEMENT SYSTEMS

RODENT REPELLENT SYSTEM

WLD SYSTEM (WATER LEAK DETECTION)

GAS SUPPRESSION SYSTEM

CCTV Surveillance Systems

Capture World
SECURE • CONNECT • PROTECT

Advanced IP and Analog CCTV solutions for real-time monitoring, video recording, remote access, and AI-based surveillance.

Access Control System

CaptureWorld
SECURE • CONNECT • PROTECT

Secure entry management using biometric, RFID cards, face recognition, and visitor management solutions.

Tripod / Boom Barrier System

Automated vehicle and pedestrian access control systems for parking management and secure entry points.

Full Height Turnstile

CaptureWorld
SECURE • CONNECT • PROTECT

FULL HEIGHT TURNSTILE

SECURE • RELIABLE • EFFICIENT

Full Height Turnstiles provide robust access control and maximum security for restricted areas. Ideal for high traffic environments that require controlled entry and exit.

- **HIGH SECURITY**
  Prevents unauthorized access and tailgating.
- **HIGH TRAFFIC MANAGEMENT**
  Designed for smooth and efficient entry & exit flow.
- **DURABLE CONSTRUCTION**
  Built with heavy-duty stainless steel for long-lasting performance.
- **ACCESS INTEGRATION**
  Seamlessly integrates with RFID, Biometric, QR, and other access control systems.

PPLICATIONS

- INDUSTRIAL FACILITIES
- CORPORATE OFFICES
- GOVERNMENT BUILDINGS
- STADIUMS & EVENT VENUES
- METRO STATIONS & TRANSPORT HUBS

- ANTI-TAILGATING DESIGN
- LOW MAINTENANCE
- LONG LIFE & RELIABILITY
- CUSTOMIZABLE SOLUTIONS
- SAFETY & PERFORMANCE

High-security pedestrian access control solution designed for restricted and critical infrastructure areas.

Fire Alarm System

Complete fire detection and alarm solutions for early warning, emergency notification, and life safety protection.

Aspiration System (VESDA)

Very Early Smoke Detection Apparatus (VESDA) providing ultra-sensitive smoke detection before visible fire occurs.

Intrusion Alarm System

Complete fire detection and alarm solutions for early warning, emergency notification, and life safety protection.

Public Address System

PUBLIC ADDRESS SYSTEM

CLEAR COMMUNICATION. SAFETY EVERYWHERE.

Our Public Address Systems are designed to deliver clear, reliable and instant voice communication across commercial, industrial and public infrastructures. Ideal for announcements, emergency alerts, background music and system integration.

- **CLEAR & INTELLIGIBLE VOICE** — High quality sound output ensures clear communication in every environment.
- **RELIABLE & EFFECTIVE** — Built for continuous operation with high reliability and system stability.
- **EASY TO USE** — User-friendly operation with simple controls and zone management.
- **FLEXIBLE & SCALABLE** — Suitable for small to large installations with future expansion capability.
- **SAFETY & EMERGENCY READY** — Supports emergency announcements and integration with fire alarm systems.

TYPICAL APPLICATIONS

SHOPPING MALLS | CORPORATE OFFICES | INDUSTRIAL PLANTS | EDUCATIONAL INSTITUTIONS | HOSPITALS | AIRPORTS & TRANSPORT HUBS

SYSTEM COMPONENTS

PAGING MICROPHONE | POWER AMPLIFIER | ZONE SELECTOR | CEILING SPEAKER | HORN SPEAKER | WALL SPEAKER | VOLUME CONTROL | RACK CABINET

HIGH QUALITY AUDIO | RELIABLE & DURABLE | EMERGENCY INTEGRATION | MULTI-ZONE MANAGEMENT | EASY INSTALLATION & MAINTENANCE | SAFETY COMPLIANT

Professional audio communication systems for emergency announcements, paging, and public information broadcasting.

BMS System

Capture World
SECURE • CONNECT • PROTECT

BMS SYSTEM

BUILDING MANAGEMENT SYSTEM

Smart Control. Better Efficiency. Sustainable Buildings.

Our Building Management System (BMS) integrates and monitors all critical building services on a single platform to improve operational efficiency, reduce energy consumption, enhance comfort and ensure a safe and sustainable environment.

CENTRALIZED CONTROL
Monitor and control all building systems from a single, intuitive interface.

ENERGY EFFICIENCY
Optimize energy usage, reduce costs and support sustainability goals.

OPERATIONAL EXCELLENCE
Automate operations, streamline workflows and reduce manual intervention.

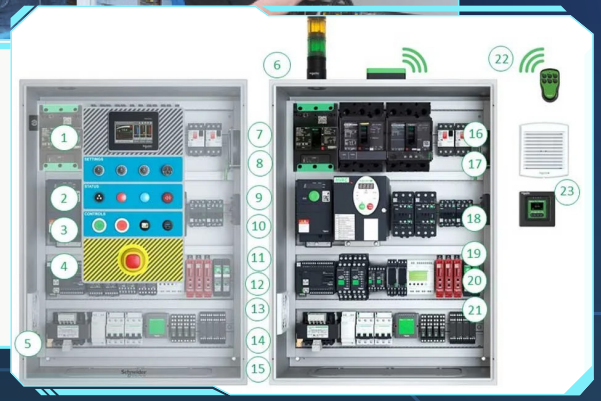

COMFORT & SAFETY
Maintain optimal indoor conditions and ensure safety of occupants and assets.

ALARMS & NOTIFICATIONS
Real-time alerts and event notifications for fast response and minimal downtime.

REPORTING & ANALYTICS
Advanced analytics and reports for informed decision making and compliance.

SYSTEM INTEGRATION

HVAC SYSTEM | LIGHTING SYSTEM | ELECTRICAL SYSTEM | PLUMBING SYSTEM | FIRE ALARM SYSTEM | CCTV & SECURITY SYSTEM | ELEVATOR SYSTEM | DG & POWER SYSTEM | ACCESS CONTROL SYSTEM

KEY FEATURES

- Real-time Monitoring & Control
- Trend Analysis & Reporting
- Scheduling & Automation
- Energy Monitoring & Management
- Alarm Management & Notification
- User Management & Security
- Web & Mobile Access
- Scalable & Future Ready

TYPICAL APPLICATIONS

COMMERCIAL BUILDINGS | INDUSTRIAL FACILITIES | HOSPITALS | HOTELS | DATA CENTERS

REDUCE OPERATING COSTS
Lower energy usage and maintenance costs

IMPROVE RELIABILITY
Ensure continuous operation and system reliability

ENHANCE COMFORT
Maintain ideal environment for occupants

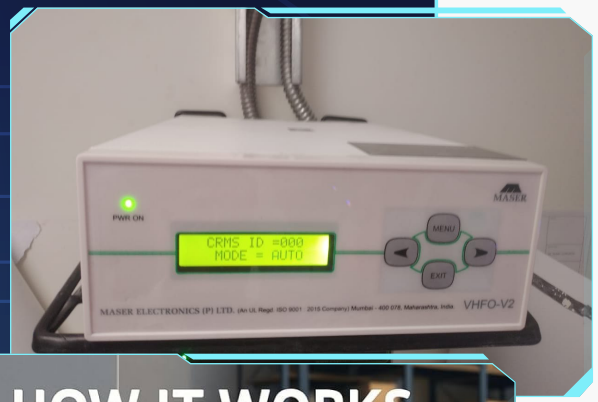

ENSURE SAFETY
Protect people, property and assets

SUPPORT SUSTAINABILITY
Reduce carbon footprint and build a greener future

Centralized Building Management System for monitoring and controlling HVAC, lighting, energy, and critical infrastructure.

Rodent Repellent System

CaptureWorld
SECURE • CONNECT • PROTECT

RODENT REPELLENT SYSTEM

HUMANE. SAFE. EFFECTIVE.

Our Rodent Repellent System uses advanced ultrasonic technology to drive away rodents by emitting high-frequency sound waves that are inaudible to humans and pets but highly disturbing to rodents.
It provides a safe, chemical-free and eco-friendly solution for rodent control in residential, commercial and industrial environments.

ADVANCED ULTRASONIC TECHNOL
Emits variable frequency sound waves that create a hostile environment for rodents.

HUMANE & SAFE
Does not kill or harm rodents. Safe for humans, pets and the environment.

CHEMICAL-FREE SOLUTION
No poisons, traps or chemicals. Ideal for food handling and sensitive areas.

24/7 CONTINUOUS PROTECTION
Works continuously to prevent rodents from nesting and returning.

LOW MAINTENANCE
Durable system with minimal maintenance and low operational cost.

WIDE COVERAGE
One system covers a wide area depending on the environment and layout.

APPLICATIONS

WAREHOUSES | FOOD PROCESSING AREAS | RESTAURANTS | PARKING AREAS | OFFICES | GARBAGE ROOMS | PLANT ROOMS

HOW IT WORKS

Ultrasonic waves emitted 24/7 → Rodents feel threatened and leave the protected area → High-frequency ultrasonic waves cause stress and discomfort to rodents, driving them away from the area.

KEY BENEFITS

Effective Rodent Control | Eco-Friendly & Sustainable | Humane & Cruelty-Free | Protects Property & Inventory | Cost-Effective Solution | Improves Hygiene & Safety

CHEMICAL FREE | SILENT TO HUMANS AND PETS | SAFE FOR FOOD AREAS | ENERGY EFFICIENT | RELIABLE & DURABLE | EXPERT SUPPORT & SERVICE

Electronic rodent control solutions designed to protect critical equipment, cables, and infrastructure from rodent damage.

WLD System
(Water Leak Detection)

WLD SYSTEM

WATER LEAK DETECTION SYSTEM

DETECT. ALERT. PROTECT.

WLD System provides early detection of water leaks and flooding to prevent property damage, minimize downtime and reduce repair costs.
Ideal for critical environments and infrastructure where water leaks can cause significant impact.

- **EARLY LEAK DETECTION** — Detects even the smallest leaks before they become major issues.
- **INSTANT ALERTS** — Real-time notifications via BMS, email, SMS and audible alarms.
- **PREVENTS DAMAGE** — Helps prevent water damage, equipment failure and business disruption.
- **24/7 CONTINUOUS MONITORING** — Constant monitoring ensures protection 24 hours a day, 7 days a week.
- **EASY INTEGRATION** — Seamless integration with BMS and other building management systems.

- **WATER LEAK SENSORS** — High sensitivity leak detection cables and spot sensors identify water presence instantly.
- **ZONED DETECTION** — Divide the area into multiple zones for precise location identification of leaks.
- **AUDIBLE & VISUAL ALARM** — Local alarms with strobe and buzzer alert occupants immediately.
- **BMS INTEGRATION** — Supports Modbus, BACnet and SNMP for seamless integration with BMS.
- **REPORTING & LOGGING** — Event logging and reporting for analysis, compliance and audit purposes.
- **RELIABLE & COMPLIANT** — Reliable performance with minimal false alarms. Complies with industry standards.

APPLICATIONS

DATA CENTERS | TELECOM ROOMS | ELECTRICAL ROOMS | PLANT ROOMS | MUSEUMS & LIBRARIES | HOSPITALS | COMMERCIAL BUILDINGS

SYSTEM COMPONENTS

WLD PANEL | LEAK DETECTION CABLE | SPOT LEAK SENSOR | VISUAL ALARM | BUZZER

HOW IT WORKS

Water is detected by the sensor or cable → Signal is sent to the WLD Panel → Alerts are triggered locally and remotely → Users are notified via BMS, SMS, Email

KEY BENEFITS

- Minimizes water damage and repair costs
- Reduces downtime and operational loss
- Cost-effective solution with high ROI
- Peace of mind with proactive protection

Early detection of water leakage in critical areas such as data centers, server rooms, and utility facilities

Gas Suppression System

GAS SUPPRESSION SYSTEM

FAST DETECTION. RAPID RESPONSE. MAXIMUM PROTECTION.

Our Gas Suppression System is an advanced fire protection solution designed to detect and suppress fires quickly, safely and effectively—minimizing damage to critical assets and ensuring business continuity.

- **RAPID FIRE SUPPRESSION** — Releases clean agent gas within seconds to suppress fire before it spreads.
- **SAFE FOR PEOPLE & EQUIPMENT** — Uses clean agents that are safe for humans and leave no residue—ideal for sensitive environments.
- **EARLY DETECTION** — High-sensitivity detectors ensure early fire detection for faster response.
- **RELIABLE & AUTOMATIC** — Fully automated system with 24/7 monitoring and inbuilt self-diagnostics.
- **COMPLIANT & CERTIFIED** — Designed and installed in compliance with NFPA, ISO 14520, and local standards.
- **LOW MAINTENANCE** — Engineered for long-term reliability with minimal maintenance requirements.

KEY BENEFITS

- **PROTECTS CRITICAL ASSETS** — Ideal for data centers, control rooms, telecom, electrical rooms, and valuable equipment.
- **MINIMIZES DOWNTIME** — Fast and effective suppression reduces damage and ensures business continuity.
- **CLEAN & ECO-FRIENDLY** — Uses environmentally friendly clean agents with zero ozone depletion potential.
- **COST-EFFECTIVE PROTECTION** — Prevents extensive damage, reduces repair costs and protects investments.
- **CUSTOMIZABLE SOLUTIONS** — Tailored system design to meet the specific risk and layout requirements.

TYPICAL APPLICATIONS

SYSTEM COMPONENTS

HOW IT WORKS

CLEAN AGENT OPTIONS

- FM-200® (HFC-227ea)
- Novec™ 1230
- Inergen® (IG-541)
- CO_2 (Carbon Dioxide)
- FK-5-1-12 (Novec™ 125)

ECO FRIENDLY

FAST & RELIABLE FIRE SUPPRESSION | SAFE FOR PEOPLE & EQUIPMENT | CLEAN AGENT TECHNOLOGY | 24/7 MONITORING & AUTOMATIC OPERATION | COMPLIANT WITH GLOBAL STANDARDS | ENGINEERED FOR MAXIMUM PROTECTION

Automatic fire suppression system using clean agents to protect sensitive equipment without causing damage.
